DETAILED ACTION

1. The preliminary amendment filed on 3/22/2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3,6,16-17,19-22,28,31-33,36-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Sperry et al. 6,311,740.

Sperry et al. disclose a foam chemical dispenser device as seen in Figure 1, which comprises a dispenser housing (148), the dispenser housing having a body portion defining a mixing module reception area (218), a mixing module positioner adjustably supported by the dispenser housing between a mixing module hold position and a mixing module access position (col. 27, ll. 60-67), a finger releasable locking device (304) which, when in a locking mode, locks the mixing module positioner in the hold position and when in a release mode provides for positioner adjustment to the access position (col. 31, ll. 3-59), a pivotable door pivotably supported by the dispenser body (col. 43, ll. 5-34). The device shown by Sperry et al. will perform the method recited in claims 40-46 during normal operational use of the device.

Allowable Subject Matter

4. Claims 4-5,7-15,18,23-27,29-30,34-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sperry 5,727,370, Sperry et al. 5,255,847, Sperry et al. 5,964,378 and Derian et al. 5,499,745 disclose other types of foam dispenser.
